BERKELEY

Dec. 26, 1917.

Mr. J. M. Johnston. -

Please accept my congratulations
on your addition of Eriogonum microthecum to
the flora of the San Gabriel Range. Your material
is rather near the type of the species. In the arid
region east of the Sierra Nevada crest occur forms
which have been in a way defined as varieties,
but your specimens may well pass for the species.

Thanking you for the material and with
best wishes,
Yours very truly

W. L. Jepson
